

Exercise: Creating Directories and Files in The Terminal

1. Create the “MyExperiment” Directory.
2. Create a README.md file in MyExperiment.
3. Create the Scripts directory.
 - a. Create the three python files in those directories.
4. Create the Data directory.
5. Create the Session1 subdirectory in Data.
6. Fill it with cond1.csv through cond3.csv
7. Copy the Session1 directory to Session2.

```
MyExperiment
├── README.md
